

Built-in support for every EAL student

IXL is available in 90 different languages! This unprecedented language support enables **all** students to make progress in essential skills, even if they are still building their English language abilities.

Teachers can make on-demand language support available to **each student in their native language**, to instantly provide tailored support for all students in their classroom learning English as an additional language

With a simple click, students can see IXL's maths and science skills in their native language.

Brittany économise pour le cadeau d'anniversaire de son amie Reggie. Chaque semaine pendant 5 semaines consécutives, Brittany économise 5 \$.

Brittany is saving up for her friend Reggie's birthday gift. Every week for 5 weeks in a row, Brittany saves \$5.

The letter m stands for the total amount of money Brittany will save. Which equation can you use to find m ?

$5 + 5 = m$ $5 \times 5 = m$
